**TITLE OF SUBMISSION:** Sailing into Singapore's Sustainable Future

**SUMMARY:** Our drawing shows Singapore's journey towards a sustainable future. On the left, we drew a sailboat, Merlion and Esplanade that represents our beautiful garden city today. On the right, a futuristic ship symbolizes our future with AI technology, electric vehicles, and clean energy. Flying cars soar above, allowing us to repurpose land for green spaces, wind turbines, and solar panels. An hourglass reminds us to plan and use resources wisely. Together, we can protect our planet for generations to come. Like a rainbow, a beautiful and bright future awaits!
